

LAMPRE® LAMINITE™ MARKERBOARD FINISH

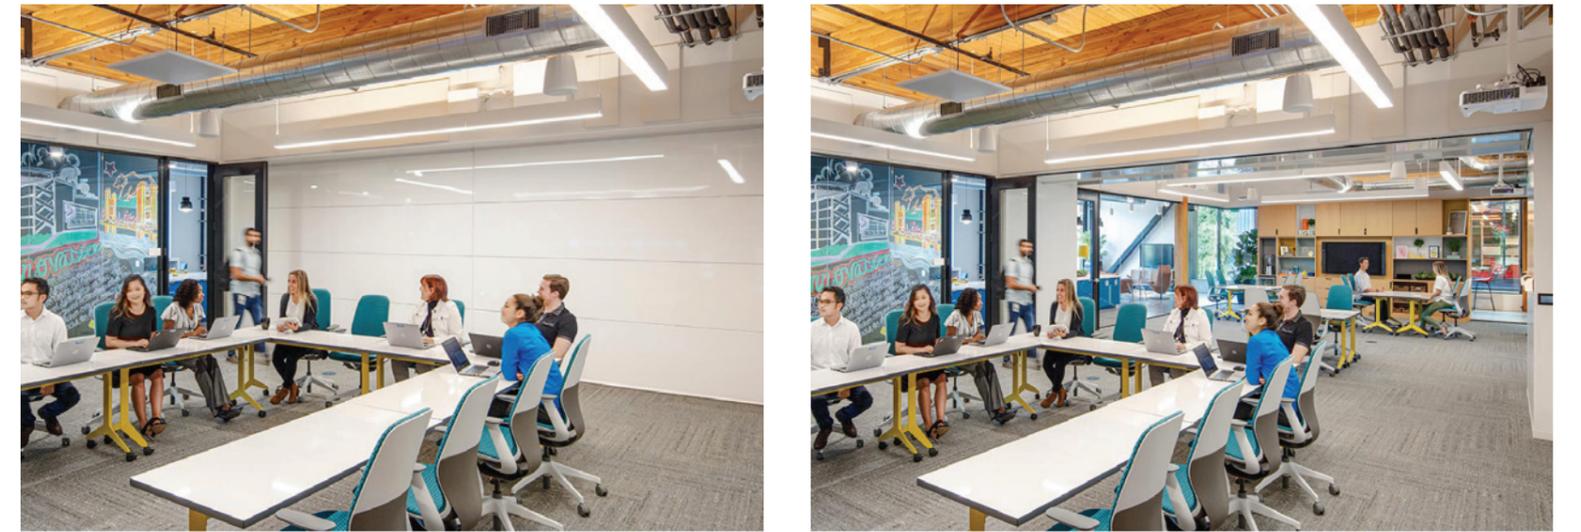

create your space to collaborate, brainstorm and innovate!

Give your classroom added functionality with Skyfold vertically folding operable walls in a white marker board finish.

It's more than just a room divider. Skyfold creates acoustically superior, connected spaces where students can learn, focus and collaborate, and which can be reconfigured easily to accommodate multipurpose classrooms. With the marker board finish, the Skyfold wall also becomes a writing surface to be used by teachers and students alike for an integrated and flexible learning environment.

Multipurpose Vertically Folding Retractable Walls

Skyfold folding walls give added value for the people using a space since the wall not only acoustically and physically divides space, but with a markerboard finish can also be used as a writing surface or as a projection surface for videos and presentations.

Skyfold's standard white markerboard finish is available on all Classic™, Zenith® and Zenith® Premium vertical folding wall technology.

Acoustical Privacy of the installed system exceeds industry standards: up to STC 60 / RW 59

Space-saving design: no visible mechanisms, no floor or wall tracks, and no loss of useful floor space

Automatic, rapid and quiet system with simple turnkey operation

Safety first: equipped with two-person operation and auto-reverse safety sensors

White marker board can be **applied to the entire wall or selected panels**

Available on all models (except Mirage®)

Finishes - freedom to design

Fabric | Vinyl | Wood Veneer | Marker Board
Mixed Finishes | Murals | Specialty Metals
Plastic Laminate | Paint

Panel finishes cannot exceed 1/8" (3mm) in thickness. Moreover, customer supplied vinyl or fabrics cannot exceed 0.040" (1mm) in thickness since these finishes are wrapped around Skyfold's panel edges. Finishes that exceed 0.040" (1mm) in thickness can be applied onto the face of the panel only and must be rigid in nature, such as a plastic laminate or wood veneer.

Maximum weight of material: 0.111 lbs/ft² (0.542 kg/m²). Only acoustically transparent fabric finish for Skyfold Classic NRC™

Skyfold is pleased to be an official member of the U.S. Green Building Council. The Green Council is committed to promoting better designed buildings that are not only more environmentally and socially responsible, but also help improve the quality of life for those who occupy them and the communities in which they are built. The Council has developed a benchmarking system known as LEED (Leadership in Energy & Environmental Design). When it comes to recycled materials, architects and owners who choose a Skyfold vertically folding operable wall system can calculate the following toward LEED accreditation on their projects. In order to continue protecting our environment, it is essential that we all do our part by using recycled materials whenever possible. Skyfold is proud to help.
